Wave Relay® is a Mobile Ad Hoc Networking System (MANET) designed to maintain connectivity on the move. It is a scalable, peer-to-peer network which provides data, video, and voice even in the most challenging applications. With user throughput of 41 Mbps UDP and 31.1 Mbps TCP, Wave Relay® provides a dynamic, reliable, and secure wireless networking solution beyond mesh.

THE MPU4 BRINGS THE WAVE RELAY® MOBILE AD HOC NETWORK (MANET) CAPABILITY DIRECTLY TO THE DISMOUNTED USER.

Seamless Layer-2 Ethernet connectivity facilitates plug-and-play operation of cameras, video encoders, IP sensors, and other devices. In addition, the MPU4 is the smallest, lightest and most portable wireless MANET solution from the Wave Relay® product family. The MPU4 is compatible with 3-pin twist lock batteries providing up to 14 hours of run-time. The MPU4 connects to Android™ phones and tablets through a high speed secure cable which also powers the device from the standardized battery.
