SOFTWARE TEST ENGINEER

ABOUT THE COMPANY
Persistent Systems is a growing business that develops Mobile Ad hoc Networking (MANET) wireless radio systems for US Government and commercial applications. The radios are typically worn on the person, mounted to manned vehicles, integrated into autonomous unmanned vehicles, or installed at fixed sites. The systems provide on-the-move data, voice, video, and situational awareness capability. Located in the heart of New York City, Persistent Systems is an exciting company that is passionate about delivering cutting edge products.

JOB DESCRIPTION
Persistent Systems is looking for a Software Test Engineer to provide special analysis required for initial software testing, quality assurance, and regression testing. The Software Test Engineer will be responsible for ensuring that our products meet the rigorous standards required by management and our customers.

EDUCATION
Candidates should possess a BS in Computer Science, Math, Physics, or related. CS and/or, advanced degrees preferred, minimum 7 years of industry experience; at least 3 years in testing.

QUALIFICATIONS / EXPERIENCE
Other requirements include:

- 5+ years of experience in functional automated testing
- 3+ years of experience in software development using C/C++, Java, VB, ASP, PHP, or similar programming languages
- Database experience including proficiency at writing and executing SQL database queries is a plus
- Experience working with a diverse group including business analysts, technical leads, end users, outsourced test engineers, and application development team members to ensure all internal and external dependencies for the testing process are handled
- Experience participating in software test requirements
- Experience with process improvements, including driving and enhancing data and process quality
- Experience building software test plans including regression, performance, and stress testing.
- Experience generating procedure, test plans, and test result reports
- Experience writing scripts to automate tests
- Experience building test platforms, fixed and variable in order to facilitate repeatable, efficient software test life cycle.

**Applicant must have a security clearance or be able to obtain a security clearance.**

EMPLOYEE BENEFITS
The total value of your compensation at Persistent Systems is worth significantly more than just a paycheck. Persistent Systems offers health insurance, and we provide multiple plans to suit individual needs. We also offer a matching contribution retirement plan and a flexible spending plan. We observe 8 holidays and provide two weeks of paid vacation every year.

APPLY
Please send a resume and cover letter, and compensation requirements.
